

MRM-2800

Equipment control unit with intelligent power switching.

Features

Some equipment requires standard computers to drive them. This unit can control any equipment and is suitable for a variety of applications. It can be discretely mounted on the rear of any product or on the wall. Along with the latest industry standard (ATX) computer parts the systems also has an intelligent mains controller built in. It automatically powers peripheral equipment which enables all connected equipment to be powered On/Off by a single switch (Switch can be remote from the PC with an optional Cable & remote switch). Not only does this make it easier for the user, but it is also far more eco friendly than leaving equipment on stand by when not in use.

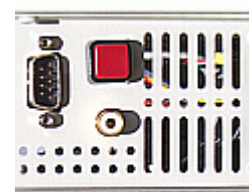

- Complies with CE standards up to the latest medical standard EN60601-1-2.
- 2 x Power outputs which are shut down on power shut down.
- 2 x 32bit PCI riser cards.
- Heavy and strong chassis.
- Takes Micro ATX boards.
- Takes 2 x 2.5" small HDD.
- Supplied with a branded Autorange (110/230V) 250W PSU from FSP.
- Slim chassis (70mm H) ideal for discreet mounting on back of equipment or on the wall.

Specifications

Model number	MRM-2800
Logo badge	N/A
5.25" Exp / Hidd	N/A
3.5" Exp / Hidd	2 x 2.5" hidden
Mainboard	Micro ATX
Power Supply	Slim 250W PSU ref FSP-250 50PLB
Ventilation	2 x 50mm Fan (Front included)
Dim: HxWxD	70 x 660 x 302mm
Weight: NW/GW	9 / 12kg
Packing	30/UK pallet

Fuse, 1 x Power In,
2 x Power Out sockets

Serial Com Port 9 pin,
On/Off Switch,
Socket for optional remote
On/Off Switch.
